Jeff,  
I wanted to let you know that the following went out to our membership:

Dear CPC members,

Due to recent complications in the path and conditions of the pandemic the very difficult decision has been taken to cancel the in-person meeting of the CPC scheduled for September 20<sup>th</sup>-22<sup>nd</sup>, 2021.  
A virtual meeting option is being built for much of our content and a modified virtual meeting schedule will be sent to you shortly.  
Meeting times for invited speakers will follow our original schedule; but please look for the updated virtual schedule to make certain that you can log in at the appropriate time.  
Our meeting platform will be Microsoft Teams.  
Registration fees will be automatically credited for a future meeting, or refunded on request.

The committee is going to present content virtually.  
There will be no need for you to travel to the meeting location.  
A standard Teams link will be sent to you; and we are keeping the time slots the same as the original invitations.

We have you on the agenda Tuesday September 21<sup>st</sup>, 1:30-3:pm local (Eastern) time.

I am sorry about the confusion, but these circumstances have been really challenging.

The committee is looking forward to your presentation.

Thank you,

Lonnie Jaycox  
Jaycox Consulting, LLC

**Subject:** RE: Fluorination in packaging discussion

The meeting will be held with usual COVID precautions.  
Separation and masks.

We have you on the agenda Tuesday September 21<sup>st</sup>, 1:30-3:pm local time.  
Location is at IoPP National Headquarters:

IoPP Headquarters  
12930 Worldgate Dr., Suite 200  
Herndon, VA 20170

Obviously, if you can attend in person it always results in a much more effective meeting. We thank you for working on this.

This group are packaging engineers and users of industrial and consumer packaging. Many currently employ fluorination as a barrier technology to compound that contain non-polar solvents (and some other materials) that readily permeate PE packaging. Our goal is to get them up to speed on the nature of the problem identified with PFAS as a product of the process.

We are having presentations on some alternative technologies and a discussion of current practices.

We would like to invite you to update us on the current understanding of the issue by EPA (FDA is also involved, along with the EU) with respect to your current research. Our organization routinely interacts with our industry regulators to keep us informed of their programs. Usually, for us, this is US DOT/PHMSA for the hazardous materials regulations and OSHA for the GHS component of the chemical industry.

We are a technology and safety focused committee.

Packaging procurement decisions and packaging technology will be seriously impacted by the status of your regulatory work. The better/earlier we understand this, the better for everyone.

I am the chair of the Packaging Commodities Subcommittee and have personally handled the environmental update for the committee for years. But this topic is so central to our mission that the executive committee took the decision to invite EPA directly into this meeting, just as we routinely do with our other regulators (DOT, OSHA, FDA).

We certainly appreciate your time and look forward to your information.

Our normal fall meeting spot has customarily been in Alexandria to make attendance as easy as possible for our government colleagues; but circumstances beyond our control forced to relocate out meeting to Herndon due to a hotel closure at the last minute.

Lonnie,

As it turns out I can make the presentation in person but having the remote option is good given the Delta variant issue.

So, with all of that in mind I need to pull some slides together quickly because they have to go through our internal clearance, etc.

Can you remind me of the specific topic(s) you had in mind and the schedule/timing?

Thx

Jeff

Jeff,  
We now have the capability for you to present remotely to the meeting if you cannot attend in person.  
If that time slot works for you we can finalize the schedule regardless of your ability to attend in person.  
Thank you, and I am sorry about the level of uncertainty in all this, but circumstances are as they are.

Hi Lonnie,

One issue comes to mind with the variant situation. I think we need to check to see if we are even allowed to do in-person meetings even with all the precautions.

Will get back to you as soon as possible.

Thx

Jeff Dawson

Hello,

Our committee has reached a good registration number for our fall meeting and we will be meeting in person as discussed below.

We have a spot on our agenda for an update from EPA on the current state of your PFAS research with respect to fluorination.

Our meeting is set as described below.

The meeting is as at:

IoPP HeadQuarters  
12930 Worldgate Dr., Suite 200  
Herndon, VA 20170

The time is: 1:30-3:00pm on Tuesday the 21<sup>st</sup> of September.

Does this work for you?

The meeting will be with masks and distancing.

Thank you,  
Lonnie Jaycox

**Subject:** RE: Fluorination in packaging discussion

Greetings.

Well we had some complications to our meeting plans due to our conference hotel in Alexandria being closed to turn into condos.

I think this is an effect of the Amazon headquarters project. It is the second time we have been kicked out of a hotel for this reason in Alex.

We have managed to put together the meeting in a new space:

IoPP HeadQuarters  
12930 Worldgate Dr., Suite 200  
Herndon, VA 20170

Yes, our organizational mothership stepped in to the rescue.

I have an agenda slot for an EPA presentation/Q&A on Tuesday, September 21, 2021 from 1:30pm-3:00pm set aside for this topic.

Jeff, is this location and time suitable for you?

Thank you both for your time and patience while we sorted this out.

Hi Lonnie

How are you doing?

It was great chatting with you regarding the different fluorination processes and levels. It really helps me understand more on how PFAS could be formed through fluorination.

I would like to introduce to you Jeff Dawson, Science Advisor for the U.S. EPA, Office of Chemical Safety and Pollution Prevention. Jeff will be in a better position to talk to you about policies and non-analytical science regarding PFAS on HDPE containers.

Regards

Thuy

Thank you for responding.  
I would be glad to speak with you at 11:00 am eastern.  
I am in the central time zone.  
Should I call you at the number below; or should I send a meeting invitation on something like Teams?  
You could also call me at either number listed below.  
Again, thank you for taking your time for us.

Good afternoon  
My name is Thuy and I am the BC at the Analytical Chemistry Branch lab of OPP. Our lab did the testing of the fluorinated HDPE containers  
Is it possible for us to chat so I can understand what you want us to present at your meeting ? I am available tomorrow Thursday May 27 from 11 -noon and 1-2PM ET. I will be then be on leave and won't return to the office until June 7<sup>th</sup>. As of today I am available all day Monday June 7<sup>th</sup> and Thursday June 10<sup>th</sup> 9:00AM-1PM  
Please let me know

Thanks

Thuy

Mr. Messina,  
My name is Lonnie Jaycox and I am on the executive committee of the IoPP Chemical Packaging Committee.  
This is an industry organization that meets in the Washington DC area (Alexandria) every fall to discuss issues of importance to the chemical packaging community.  
This is a technical committee of IoPP and is not a lobbying organization. We exist solely to enhance the technical capabilities of packaging engineers in the chemical industry in technical and regulatory aspects of our jobs.  
Website here:  
<https://www.iopp.org/i4a/pages/index.cfm?pageid=3032>

During the pandemic we were incapable of meeting in person.

However, our fall meeting is on for September 20-22 at the Holiday Inn Hotel and Suites, Old Town Alexandria.

I am the committee chair that is tasked with bringing in SMEs to address pertinent topics.

The committee would like to have a speaker who could address the current understanding of the situation regarding PFAS content in packaging and the use of fluorination treatment as a barrier to non-polar solvents in industrial packagings.

Is there a speaker from US EPA who could provide an update to our committee during our meeting?

Thank you for your time,

Lonnie Jaycox
